-----

Rockville, Md. - July 8, 2025 - Standard Solar and Port Newark Container Terminal (PNCT) have completed a 7.2 megawatt (MW) solar project engineered to integrate with the operational ...

Israel has received its world's first 100-kilowatt Iron Beam system, aiming to boost its military capabilities and defence technologies. Developed by Rafael Advanced Defense ...

Learn how terminals are embracing renewable energy, highlighting solar, wind, electrification & grid resilience with LBCT.

The completion of this solar energy project marks an important milestone not only for Port Newark Container Terminal but also sets an ...

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly packed, high-traffic shipping facility, without disrupting operations or ...

Our generators offer a superior experience from day one and for years to come. Our durable design ensures your generator lasts longer, operates more quietly, and starts more efficiently ...

Rockville, Md. - July 8, 2025 - Standard Solar and Port Newark Container Terminal (PNCT) have completed a 7.2 megawatt (MW) solar project ...

The solar project consists of one roof-mounted and nine carport canopy solar photovoltaic (PV) arrays, allowing for significant solar generation without intruding on terminal operations.

Standard Solar installed the project, which is made of rooftop installations and solar canopy systems to avoid

taking up ground space in ...

The completion of this solar energy project marks an important milestone not only for Port Newark Container Terminal but also sets an example for ports worldwide seeking ...

The Kohler KG100R is a powerful and adaptable 100kW standby generator engineered to deliver reliable three-phase or single-phase backup power for commercial, industrial, and high ...

Generating renewable power on-site at the port terminals can significantly reduce this off-site pollution, improve public opinion of the ports, and reduce the terminal's energy expenses. ...

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the ...

100kW diesel generators are ideal for agriculture, construction, and manufacturing sectors where reliable power is vital. These units are particularly suited for both primary and backup power ...

Standard Solar installed a 7.2 MW solar system to provide 50% of the energy needs for the Port Newark Container Terminal (PNCT) ...

The solar project consists of one roof-mounted and nine carport canopy solar photovoltaic (PV) arrays, allowing for significant solar generation without ...
