In Senegal, where energy requirements are growing rapidly, Omexom is providing a promising alternative to centralised electricity supply by rolling out power plants that combine ...

In May 2022, Senegal's installed generation capacity was reported as 1,555 MW. At that time, the majority of electricity sources were from non-renewable fossil-fuel, with solar accounting for only 112 MW. This power station is part of the national plan to diversify the country's generation mix and reduce over-reliance of fossil-fuel sources. The solar farm will have an attached battery energy storage system rated between 15MWh to 4...
