What are ESC modular steel bridges?

ESC modular steel bridges are prefabricated structures composed of steel truss panels, transom beams, reinforcing chords, bracings, decking boxes and connection components that can be rapidly assembled on-site. These bridges are designed to be portable, reusable, and adaptable to various sizes and load requirements.

How wide is a modular steel bridge?

Custom lengths and widths for modular steel bridges can be easily accommodated. Modular sections are usually about 8 feet wide for shipping on standard trailers. Using prefabricated construction does not mean that the modular steel bridge has to use pre-made sections of a certain length.

What are Waagner-Biro modular bridges?

Waagner-Biro Modular Bridges are designed in such a way as to allow that each bridge can be constructed by local, unskilled workers using the simplest tools and lifting equipment.

Can a modular steel bridge cross a long distance?

You can still use these modular steel bridges to cross long distances, however they will have to be broken up every so often with a support pier. Custom lengths and widths for modular steel bridges can be easily accommodated. Modular sections are usually about 8 feet wide for shipping on standard trailers.

Crafted with an engineered steel frame and fully powder-coated for long-lasting protection, our bridge kits are shipped disassembled for convenience. All components can be assembled ...

This innovative construction solution not only precisely addresses the unique challenges of the European and American markets but also stands out with superior environmental performance ...
