Did you know Paraguay's electricity demand grew 42% in the last decade? Let's explore how modern energy storage systems are reshaping Asuncion's power infrastructure.

In this study, a new emerging energy storage system named gravity energy storage (GES) is integrated into large-scale renewable energy plant with an aim to investigate its optimal design ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid ...

Asuncion faces unique energy challenges with its tropical climate and growing industrial sector. The city's peak electricity demand reached 1,850 MW in 2023, yet renewable integration ...

When Paraguay's National Power Company announced the winning bidder for its landmark Asuncion Energy Storage Project last week, industry analysts weren't just watching ...

Combining compressed air energy storage (CAES) with solar-thermal reservoirs, this \$120 million project might just redefine urban energy resilience in South America.

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, ...

The objective of the project HA-G1048 is to maximize the use of the energy produced by the 8-MWp solar photovoltaic plant (SPP) to further reduce the use of thermal power, by ...

100 massive concrete blocks, each weighing as much as 10 adult elephants, dancing to the rhythm of
