What is a portable power bank?

Small enough to fit in your backpack or laptop bag, this portable power bank is perfect for on-the-go charging when you don't have the convenience of an AC outlet nearby. With dual USB ports, you can charge two devices simultaneously including smartphones, tablets and other USB powered devices.

What features should you consider when buying a portable power bank?

Pass-through charging is another feature to consider; with it, you can charge your device and a portable power bank simultaneously. That's convenient if both your phone and backup battery are running out of power.

Should you buy a power bank or a portable charger?

The best power banks are always handy. Our gadgets have a Murphy's law-like ability to run out of power at the least convenient moment: as you step on the bus, right in the middle of an important meeting, or just as you get comfortable on the couch and press Play. But with a portable charger, you can keep using your devices.

Portable Power Station 300W (600W Peak), 192Wh (60,000mAh) Solar Generator, LiFePO4 Battery with AC Outlets, 5.5LB Power Bank for Outdoor Camping, Traveling, Home & ...
