---

A significant milestone was recently reached in Tirana, where senior officials from the European Union, the European Bank for Reconstruction and Development (EBRD), and ...

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 ...

The article aims to offer insights into how PV systems might contribute to sustainable energy generation, grid stability, and energy management in Albania by exploring ...

By developing a robust solar infrastructure, Albania aims to provide a more stable and resilient energy supply for both its domestic needs and the wider Western Balkans region. ...

The region of Durrës in Albania, located less than 50 kilometers from Tirana, is hosting the construction of a 100-megawatt solar power plant. This ...

By choosing an off-grid solar system, with the help of our team at Solar Smart Living, Solar Smart Living can design a system to suit your unique set of needs.

By combining technical expertise with deep market knowledge, ALBESP helps accelerate Albania's renewable transition and build a cleaner, more resilient energy future.

The region of Durrës in Albania, located less than 50 kilometers from Tirana, is hosting the construction of a 100-megawatt solar power plant. This project, developed by Voltalia, is ...

By developing a robust solar infrastructure, Albania aims to provide a more stable and resilient energy supply for both its domestic ...

He discusses how Albania is reshaping its energy landscape through market liberalisation, increased solar investment and a gradual transition from hydropower to solar to ...

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the ...

Five utility-scale solar photovoltaic parks with a combined installed capacity of 156 MW were commissioned in Albania in 2025. The largest of these, Sunny Side Solar (100 MW), ...

Fortis Energy has begun the construction phase of the 75MW Ersek&#235; solar PV project in Albania, which is co-located with a BESS.
