The Chichas Solar Power Plant Project represents a significant milestone in Bolivia's decarbonization strategy, as it will help replace natural gas-based thermoelectric ...

With this operation, more than 141,000 people will have new or improved access to electric power for domestic and productive use through grid extension, construction of mini ...

ClimeSol, a subsidiary of the Canadian company ClimeCo, has connected Bolivia's largest private solar power plant to the national grid. The milestone is a major step ...

The Altiplano plateau in western Bolivia has some of the world's highest and most consistent levels of solar radiation, creating high potential for solar photovoltaic power in the ...

Announced by the government, this ambitious project will install solar panels in rural areas, aiming to provide electricity for 20,000 families ...

The Cerro San Simon mini-grid is the first fully integrated smart grid in Bolivia, and it is backed up by the largest lithium-ion battery of its kind in the country.

The Chichas Solar Power Plant Project represents a significant milestone in Bolivia's decarbonization strategy, as it will help ...

The project was implemented as part of the GIZ Programa de Energías Renovables y Eficiencia Energética PEERR II, which supports the integration of renewable ...

A Canadian company, ClimeSol, has successfully connected Bolivia's largest private solar power plant to the

national grid. The 3 MW solar facility in the Bolivian lowlands is operational and ...

By integrating UKSOL modules, Bolpegas ensures the delivery of world-class solar solutions precisely tailored to Bolivia's unique conditions and energy demands.

The Altiplano plateau in western Bolivia has some of the world's highest and most consistent levels of solar radiation, creating high ...

The project was implemented as part of the GIZ Programa de Energías Renovables y Eficiencia Energética PEERR II, which supports ...

LACIF contributes to Bolivia's first large-scale photovoltaic project, which is led by AFD. It entails the construction of a 50 MW photovoltaic (PV) power plant in the Altiplano region, in the ...

Announced by the government, this ambitious project will install solar panels in rural areas, aiming to provide electricity for 20,000 families across 110 communities in 35 ...

With this operation, more than 141,000 people will have new or improved access to electric power for domestic and productive use ...
