How does Cape Town support decarbonisation of electricity?

ties and the City of Cape Town's Energy Strategy
THE KEY AREAS OF ALIGNMENT INCLUDE:
Decarbonisation of electricity is evidenced through the City of Cape Town's delivery and support of new renewable energy sources (whether owned or procured by the City or from the private sector) to reduce the local grid emissions factor. This is

Is Cape Town a good place to get wind power?

Cape Town and its surroundings enjoy strong wind, which can serve as wind power. This led to the development of some big-name projects that are already up and running, with more on the horizon. Sere Wind Farm on the West Coast is the most discussed project. It's attracted so much attention because it's part of the national renewable energy program.

How many solar panels have been authorised in Cape Town?

Cape Town Market secures energy security with rooftop solar
The City confirmed in March that more than 5,000 solar PV systems have been authorised to date, totalling 126MVA (mega volt amperes).

Do all Cape Town residents have access to energy?

oss all of Cape Town.
UNDERSTANDING ENERGY POVERTY
Access to energy is an essential component of contemporary urban life. However, due to a range of socio-economic conditions, not all residents have access to the energy required to meet their daily n

Cape Town's Small-Scale Energy Generation programme promotes uptake of rooftop solar and wind turbines. The city won a High Court case to allow citizens to sell their excess electricity ...
