---

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which ...

Without robust storage, even cutting-edge solar farms become...well, decorative. That's why recent advancements in battery tech and smart grid systems are rewriting Cape Verde's ...

Explore the full scope and impact of this initiative in our detailed report on the Cabo Verde solar project. The nation's ambitions are also reflected in a separate solar tender for a 5 ...

This article explores how the archipelago is overcoming energy challenges through innovative storage solutions, with insights on technology, economic impact, and lessons for island nations ...

South Africa's electricity minister has said the largest solar-plus-storage project, with a combined solar generation capacity of 540MW, and 225MW/1,140MWh of battery energy storage system ...

Cape Verde's Special Project Management Unit is inviting bids to design, supply and install four energy storage systems (ESS). The ESS will be located on Fogo island (2.08 MW/2.08 MWh), ...

A new solar project is expected to increase the penetration of renewable energy on Cape Verde to more than 40%.

Cape Verde is moving toward a cleaner energy future by expanding its wind capacity by 13.5 megawatts and adding 26 megawatt-hours of grid-connected battery storage.

Ryse Energy has provided reliable access to energy to a village of 700 people in Cape Verde, that were previously living without energy, helping to shift the energy balance.

A renewable energy mini-grid system has been inaugurated in Cabo Verde that will supply electricity to hundreds of residents living on the archipelago off of West Africa.
