---

Chile can achieve carbon neutrality through solar and wind power expansion, energy storage growth, and green hydrogen development. This will also help reduce reliance ...

Ongoing investments in battery storage systems will also pave the way for new wind and solar plants. In Chile's north, Spanish company ...

Chinese companies have in recent years built, or announced plans to build, Chile's longest power line, solar plants and wind farms, while in battery storage, solar giant Trina has ...

Santiago, January 10th - Chile achieved a new milestone in December 2024 by generating a record 42% of its electricity from wind and solar, according to global energy think tank Ember. ...

She warned that stagnant demand could lead to "cannibalization" across all energy sectors, making a strong case for a ...

Chile is once again on the global energy map. The Spanish multinational GES, part of CL Grupo Industrial, has confirmed the construction of a hybrid project that will combine ...

Chile is once again on the global energy map. The Spanish multinational GES, part of CL Grupo Industrial, has confirmed the ...

Ongoing investments in battery storage systems will also pave the way for new wind and solar plants. In Chile's north, Spanish company Grenergy Renovables is developing ...

Electricity generation from solar and wind sources will reach its highest level of participation ever recorded in the Chilean electricity system by 2025, consolidating them as ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

Chile has curtailed a record 5,909GWh of solar PV and wind power in 2024, up 121% from the previous year, according to trade body, ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and ...

Chinese companies have in recent years built, or announced plans to build, Chile's longest power line, solar ...

Chile has curtailed a record 5,909GWh of solar PV and wind power in 2024, up 121% from the previous year, according to trade body, the Chilean renewable energy and ...

She warned that stagnant demand could lead to "cannibalization" across all energy sectors, making a strong case for a comprehensive policy aimed at deep electrification. The ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS).
