In its annual report for 2022 Taiwan Cement said it was planning to using NHOA's technology to build seven other large-scale energy storage projects at sites in Taiwan ...

The increasing priority of decarbonization and corporate ESG (environmental, social, and governance) performance create a unique opportunity for the cement indu

Recently, a large cement group in Hunan put into operation a 4.2MW/9.03MWh industrial and commercial energy storage system (ESS), becoming the country's first 110kV ...

The CSHub has long investigated multifunctional concrete, and has uncovered a way to store energy in a mixture of carbon black, cement, and water. The technology has potential ...

This article explores how cement is being applied in renewable energy storage, highlighting innovations in thermal, electrical, and chemical storage solutions that could ...

The three companies signed a memorandum regarding the handling of mobile energy storage system for construction sites and will collaborate to achieve zero emissions at ...

Abstract: For cement factories, energy storage power stations have outstanding features such as reducing energy costs, stabilizing power supply, balancing power loads, and optimizing power ...

Schematic representation of cement-based energy storage systems, showcasing demonstrations of cement-based batteries lighting an LED and their promising integration with ...

Researchers at Southeast University have made a breakthrough by developing a new type of concrete capable
