---

The port of Emden is launching a containerised wind turbine that combines wind and solar energy, with the capacity to generate 45,000 kWh per year.

After exploring micro wind turbines, the team identified container-based systems as a more efficient solution, capable of delivering higher energy yields. The system was installed ...

Carter Wind Turbines manufactures medium-size wind turbines (300 & 500 kW) that are self-erecting, portable, and designed for distributed and ...

After exploring micro wind turbines, the team identified container-based systems as a more efficient solution, capable of ...

Our Econowind containerized units seamlessly integrate hydraulics and control cabinets, making setup a breeze. Simply hoist the containers during a port stay, and your vessel is ready to ...

Create modern, eco-friendly spaces with Corner Cast's shipping container solutions. Our bespoke designs offer innovative, affordable, and sustainable wind and solar energy spaces tailored to ...

Create modern, eco-friendly spaces with Corner Cast's shipping container solutions. Our bespoke designs offer innovative, affordable, and ...

A container wind turbine system equipped with car charging infrastructure, PV system and energy storage is now installed at NPorts in Germany.

Our containerized offshore wind energy storage solution is purpose-built to enhance the efficiency and stability of offshore wind ...

Carter Wind Turbines manufactures medium-size wind turbines (300 & 500 kW) that are self-erecting, portable, and designed for distributed and micro-grid power generation applications ...

Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and ...

Engineered to support both wind and solar energy, this outdoor system offers a high-capacity storage of up to 5 MWh, making it ideal for large-scale energy needs. Equipped with advanced ...

Our containerized offshore wind energy storage solution is purpose-built to enhance the efficiency and stability of offshore wind power systems by addressing challenges ...

A container wind turbine system equipped with car charging infrastructure, PV system and energy storage is now installed at NPorts in ...

These include mobile, containerized systems like VATA, as well as other bespoke designs for defense, disaster relief, remote industry, and niche commercial needs.
