Are outdoor solar lights eco-friendly?

Once installed, outdoor solar lights are low maintenance. These lights often use long-lasting LED bulbs, and some may need a fresh battery only every few years to maintain performance. Like other solar-powered products, these self-sufficient lights are eco-friendly and won't add a single cent to your electric bill.

Are solar lights good for outdoor use?

Solar lights are overwhelmingly powered by LEDs because they consume significantly less energy than traditional incandescent or fluorescent bulbs, allowing for smaller batteries and longer operational times. Because they are designed for outdoor use, most solar-powered outdoor lights offer decent water and weather resistance.

Can outdoor solar lights go anywhere?

Outdoor solar lights can go just about anywhere as long as the solar panel receives enough sunshine. Once installed, outdoor solar lights are low maintenance. These lights often use long-lasting LED bulbs, and some may need a fresh battery only every few years to maintain performance.

How many solar lights are there?

Over the past two years, we've tested 78 different outdoor lights (you read that right), including solar pathway, smart, spotlights, lanterns, wall-mounted, and string lights. We became solar light experts, if we do say so ourselves.
