---

What are the optimal levels of strategic solar module stockpiles in the European Union (EU) for achieving climate neutrality by 2050, and how might such stockpiles influence ...

Several measures have been taken to further support the European solar PV manufacturing sector. In 2023 and 2024, European ...

Discover the state of solar panel manufacturing in Europe, the challenges posed by imports, and what EU countries are doing to rebuild local production. Learn how European-made solar can ...

European Union "s New Regulation: "Domestic Production" Must Reach 30% for Carbon Neutrality Goals. On May 26, 2025, the EU formally passed the Renewable Energy ...

There has been little light relief for European manufacturers of solar panels over the past few years. A glut of cheap Chinese solar ...

Despite another strong year in the EU for new solar PV deployments, its solar manufacturing sector is continuing to suffer as it struggles to compete with cheaper foreign ...

European Union "s New Regulation: "Domestic Production" Must Reach 30% for Carbon Neutrality Goals. On May 26, 2025, the EU ...

The EU has doubled its solar capacity in the last three years. How have subsidies made this possible, what support is still available, and what still needs to happen?

Solar energy is affordable, clean and has been the fastest-growing energy source in the last decade. It can be used for electricity and heating, while also helping reduce EU dependency ...

Member states must ensure that 30% of their annual solar module, battery and heat pump installations are produced in the EU by 2026. This addresses a critical vulnerability: 90% ...

Several measures have been taken to further support the European solar PV manufacturing sector. In 2023 and 2024, European solar module manufacturers have faced a ...

There has been little light relief for European manufacturers of solar panels over the past few years. A glut of cheap Chinese solar panels triggered a flurry of factory closures,...

Solar panels imported or manufactured in the European Union are subject to various regulations, directives and standards. Ensuring compliance requires that the solar ...

Discover the state of solar panel manufacturing in Europe, the challenges posed by imports, and what EU countries are doing to rebuild local ...
