Most large-scale energy storage news in the region has come from Chile, where gigawatts of projects are coming online in the next few years, with major projects from CIP, ...

Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What's the best way to do this? A new study by MIT ...

This new wave of projects, including Pradera's solar-plus-storage design, will play a key role in improving grid reliability and reducing the need for fossil fuel back-up during dry ...

Most large-scale energy storage news in the region has come from Chile, where gigawatts of projects are coming online in the next few ...

Colombia is actively exploring energy storage projects and distributed energy resources, leveraging local resources to optimize network efficiency and empower various energy ...

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

The MIT Energy Initiative's annual research spring symposium explored artificial intelligence as both a problem and solution for the clean energy transition.

The 17 projects entering Colombia's National Interconnected System during the first quarter of 2025 represent more than just a ...

At the 2025 student-led MIT Energy Conference, energy leaders from around the world discussed how to

make green technologies competitive with fossil fuels.

The 17 projects entering Colombia's National Interconnected System during the first quarter of 2025 represent more than just a regulatory milestone. These installations ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

La empresa colombiana Erco Energy ha anunciado que implementará un sistema de almacenamiento en baterías de 6,9 MWh en el parque solar La Martina, de 14,7 MW de ...

Proposed new rules seek to provide greater flexibility for developers of renewable energy projects with storage components.

Search all the ongoing (work-in-progress) battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Colombia with our comprehensive ...

Colombian energy company Celsia has announced the launch of what it described as the first solar energy storage system in the country, at the Celsia Solar Palmira 2 PV farm, ...
