-----

The authors find, for the first time, the composition of Chinese overseas energy finance for both foreign direct investment (FDI) and development finance institutions (DFIs) ...

All projects at the base are scheduled to be put into operation within China's 14th Five-Year Plan (2021-25) period. Once operational, the base is expected to export 24 billion ...

The acceleration of the construction of the new energy base in the western part of China has injected a strong impetus into the ...

The aim is to set a pioneering example for peaking power sources at "Shagehuang" base, making it the "first batch, first location, ...

The Yalong River Base has launched seven large hydropower stations and five new energy projects, with a total installed capacity of nearly 21 million kilowatts and an annual ...

The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects ...

To cope with the instability of wind and solar power output, a pumped-storage power station is needed to regulate and ensure the safe operation of the power grid, as well as ...

All projects at the base are scheduled to be put into operation within China's 14th Five-Year Plan (2021-25) period. Once operational, ...

Retiring fossil-fired power plants and developing clean power generation are critical challenges to global

decarbonization. However, despite strides in shutting down carbon ...

The acceleration of the construction of the new energy base in the western part of China has injected a strong impetus into the development of this industry, and also shows the ...

The first phase of the project, with an installed capacity of 1 million kilowatts, was connected to the grid and began generating power ...

Power generation industry updates, news, and insights including gas, renewables, coal, nuclear, energy storage, hydrogen, and more.

The first phase of the project, with an installed capacity of 1 million kilowatts, was connected to the grid and began generating power in July, generating more than 1 billion kWh ...

The aim is to set a pioneering example for peaking power sources at "Shagehuang" base, making it the "first batch, first location, and first set" of model units.

The authors find, for the first time, the composition of Chinese overseas energy finance for both foreign direct investment (FDI) and ...
