Is German battery storage a good investment?

German Battery Storage on a Ri... High and further increasing volatility of power prices due to the expansion of renewables on the one hand and significantly decreasing prices for battery cells in recent years on the other hand have led to a highly attractive market environment for battery storage (BESS) projects in Germany.

How much will Germany spend on infrastructure between 2025 and 2029?

Federal infrastructure spending between 2025 and 2029 will be approx. EUR 150 billion. Reduced equity requirements: Germany commits to work towards reforming Solvency II requirements on the EU level to reduce equity requirements for infrastructure investments.

Will Germany tender a further 5GW of gas-fired power plants?

For the second and final tranche, the government will competitively tender a further 5GW of capacity from gas-fired power plants. BMWK noted that this set of procurements comes ahead of the introduction of Germany's new capacity market mechanism, planned to start in 2028.

Does Germany have a power plant strategy?

Security of power supply: As part of the (existing) "power plant strategy" (Kraftwerkstrategie) Germany intends to conduct technology neutral tenders to incentivise up to 20 GW of additional gas-fired power plant capacity by 2030.

It provides facts and figures about Germany's people, system of government, social life, politics, economy and culture. The website breaks down information into topics, with details such as ...
