Take the Kalasatama Smart District project. They've achieved 83% energy self-sufficiency through hybrid systems storing solar energy as both electricity and heat. During January's polar vortex, ...

Finland's capital is rewriting the rules of urban renewable energy with a system that's already achieving 82% efficiency in winter months - outperforming similar latitudes like Anchorage and ...

Our baseline is of a storage volume of 10 million m³, with an energy content of 870 GWh based on a temperature difference of 75 °C (which means the temperature of full storage is 80 °C ...

But here's a plot twist: Helsinki is quietly becoming the Nordic MVP in the global race for smarter, greener energy solutions. In the past three years, Finland's capital has seen ...

The status of these energy storage technologies in Finland will be discussed in more detail in the next sub-sections, giving a better understanding of the current and potential ...

Spearheaded by Carlo Ratti Associati, the project introduces a thermal energy storage system that integrates renewable energy sources to provide affordable and ...

Slated for construction this summer near Helsinki, it will be the largest in the world by all standards and contain enough thermal energy ...

This article explores the latest investment patterns, technological advancements, and regulatory developments shaping the city's energy storage projects, with specific data on battery storage ...

It offers high-capacity energy storage and energy conversion efficiency, tailored for commercial and industrial users. It adapts to dynamic electricity consumption patterns and optimizes ...

Slated for construction this summer near Helsinki, it will be the largest in the world by all standards and contain enough thermal energy to heat a medium-sized city all winter.

The initiative, which won the Helsinki Energy Challenge, aims to decarbonize the city's heating system by 2030 through a unique combination of thermal energy storage and ...

The initiative, which won the Helsinki Energy Challenge, aims to decarbonize the city's heating system by 2030 through a unique ...
