Leading companies such as Trina Solar, JA Solar, and SunPower are investing significantly in research and development to improve the performance and reduce the cost of ...

Real-world examples of data centers and IT infrastructure utilizing solar power showcase the success of this green solution. Companies like Google and Apple have invested ...

In response to the growing power demands of AI computing, Delta also introduces an innovative 800V High Voltage Direct Current (HVDC) power architecture solutions for AI ...

Many data centers feature large amounts of plant equipment, such as chillers and generators, on the roof, meaning there is simply not enough space to justify a solar deployment.

That's why we're working with Nvidia to codevelop an 800V high-voltage DC distribution ecosystem to enable further scaling of computing needs and power. High-voltage power ...

Hyperscalers are using on-site solar to power data centres. Explore what this means for energy, sustainability, and hiring trends in 2025.

To address the growing power needs of modern computing, some data centers are implementing even higher voltage architectures, shifting from 48V systems to architectures as ...

Leading companies such as Trina Solar, JA Solar, and SunPower are investing significantly in research and development to ...

Can you retrofit an old data center for renewable integration? Yes -- through a mix of LED retrofits,

High-voltage photovoltaic container for data centers

battery-backed lighting, modular solar, and rooftop redesign.

In response to the growing power demands of AI computing, Delta also introduces an innovative 800V High Voltage Direct Current ...

This whitepaper looks at the data center industry and its need for a reliable source of carbon-free energy -- and why one renewable solution stands out in meeting data center needs.

By combining solar panels with battery storage, AI data centers can achieve 24/7 power availability while cutting costs and reducing their carbon footprint. In this article, we'll ...

Many data centers feature large amounts of plant equipment, such as chillers and generators, on the roof, meaning there is simply not ...
