-----  
Does Iraq have a 5G network?

The Iraqi cabinet has approved a licence for Vodafone Global Telecommunications to operate the country's first 5G network. The cabinet directed the ministry of communications to proceed with the project, state-run Iraq News Agency (INA) reported, citing a statement by the prime minister's media office.

How many 5G base stations does China have?

China has deployed over 2.4 million 5G base stations as of 2023, accounting for over 60% of the global total. China is leading the 5G revolution. With over 2.4 million base stations, the country accounts for more than 60% of all 5G infrastructure globally.

How many 5G base stations are there in Japan?

Japan had over 100,000 active 5G base stations by 2023. Japan's 5G network is expanding rapidly, with over 100,000 active base stations by 2023. The country has taken a strategic approach, focusing on major urban centers first and gradually expanding to rural areas.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

Comparison of the number of 5G base stations in the European Union (EU) and selected countries worldwide in 2024 [Graph], European 5G Observatory, June 30, 2024.

Vodafone Iraq will initially cover Baghdad, Karbala, Najaf, and Hilla -- key cities with high demand due to year-round religious tourism. ...
