How much does it cost to install a solar battery?

As of early 2025, the average cost to install a home solar battery in the U.S. ranges between \$9,000 and \$18,000 before incentives. After applying the 30% federal tax credit, most homeowners pay \$6,000 to \$12,000 for a complete setup. For a deeper dive into specific models and performance, explore our Best Solar Battery for Home guide.

How much does a solar inverter cost?

If your solar battery system stores DC energy but doesn't come with a built-in inverter, anticipate spending an extra \$1,000 to \$1,500 on an inverter. Most solar batteries need an inverter to convert direct-current (DC) electricity into alternating-current (AC) electricity so that your home appliances can use the electricity.

How much does a solar battery cost in 2025?

In 2025, a typical solar battery installation costs \$9,000-\$18,000 before incentives and \$6,000-\$12,000 after credits. By 2026, continued cost declines are expected to make home energy storage even more accessible, with prices averaging 8-12% lower than current levels.

How much does a solar battery backup cost?

Two cabinets can connect to a single inverter for up to 36 kWh total backup power. Whole-house solar battery backup costs \$20,000 to \$32,000 installed, not including solar panels. The average home uses 28 to 30 kWh per day, requiring batteries with at least that total capacity or more to power the entire home for one day.

Wondering what a solar container system costs? Explore real-world price ranges, components, and examples to understand what impacts total cost--and if it's worth the ...

If your battery does not include an integrated inverter, expect to spend an additional \$1,000-\$1,500. A
