Do base stations need a power supply?

Power Requirements: Base stations operate on 120V AC power rather than 12V DC, requiring either built-in power supplies or separate AC-to-DC converters. Size and Ergonomics: Designed for desktop use, these radios feature full-size controls, making operation more comfortable during extended sessions.

How do I Turn on a base station/repeater power supply module?

Turn ON the circuit breaker controlling the AC outlet that is supplying power to the base station/repeater Power Supply Module, or switch on the DC-supply to a base station/repeater with a DC Power Supply Module. Turn off base station/repeater power at source (e.g., AC breaker).

How do I install a base station?

We also advise users to install the Base Station 3-5 feet off of the floor, and 5 feet away from all major electronics. To install your Base Station you will want to start by removing the Base Station from the box. Next, plug the Base Station into a power outlet using the included power adapter.

How do I pick up a base station/repeater?

DO NOT pick up the base station/ repeater by holding the Preselector (if so equipped). Use the handles on the front of the base station/repeater, or the Power Supply and Power Amplifier casings when picking up the base station/repeater. Remove the station front bezel from its chassis locking clip by carefully pulling it forward.
