Will Siemens Energy provide a synchronous condenser system in Ireland in 2021?

A synchronous condenser system that Siemens Energy provided for another project in Ireland in 2021. Image: Siemens Energy. Siemens Energy will provide the technology for a project in Ireland combining a synchronous condenser and a battery energy storage system (BESS) with a capacity of 160MWh.

What is a Bess & how does it work?

The BESS can fortify the grid and use renewable energy in the absence of intermittent sources, such as solar or wind power. It has a storage capacity of approximately 160 MWh and could supply up to 9,500 Irish households with electricity for a 24-hour period.

What challenges does Ireland's Bess market face?

According to Bobby Smith, head of Energy Storage Ireland (ESI), one of the main obstacles Ireland's BESS market faces is the lack of route to market for battery operators. "A lot of energy storage has crept under the radar so far in Ireland," he told ESS News. Developers secure planning quite easily but the route to market is a challenge.

Does Fluence have a Bess project in Ireland?

Fluence recently landed a 4-hour BESS order from Norwegian state-owned independent power producer Statkraft for a project in Ireland. Ireland was called one of Europe's five most attractive energy storage markets earlier this year by Aurora Energy Research.

According to Bobby Smith, head of Energy Storage Ireland (ESI), one of the main obstacles Ireland's BESS market faces is the lack of route to market for battery operators.

Developer Shannon LNG has obtained permission from the Irish planning authorities for a 600 MW regasification unit and a 120 MW ...

Cork, Ireland's second-largest city, is rapidly adopting BESS containerized generator sets to meet its growing energy demands while reducing carbon footprints. These modular systems ...

Siemens Energy will provide the technology for a project in Ireland combining a synchronous condenser and a battery energy storage system (BESS) with a capacity of ...

Siemens Energy will provide the technology for a project in Ireland combining a synchronous condenser and a battery energy storage ...

Irish state-owned electricity company ESB has opened a 150MW/300MWh battery energy storage system (BESS) at its Aghada site in Co Cork.

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with ...

Irish state-owned electricity company ESB has opened a 150MW/300MWh battery energy storage system (BESS) at its Aghada ...

In our latest Energy Essentials podcast we introduce the Battery Energy Storage Systems (BESS) market in Ireland and Northern Ireland, discuss the key challenges facing it ...

The BESS can fortify the grid and use renewable energy in the absence of intermittent sources, such as solar or wind power. It has a storage capacity of approximately ...

Developer Shannon LNG has obtained permission from the Irish planning authorities for a 600 MW regasification unit and a 120 MW battery energy storage system ...

Ireland is ahead of most countries in the EU, with 1.5GW of battery storage already planned. Ireland plans to generate 80% of its electricity from renewable energy by 2030.

Ireland is ahead of most countries in the EU, with 1.5GW of battery storage already planned. Ireland plans to generate 80% of its ...

The BESS can fortify the grid and use renewable energy in the absence of intermittent sources, such as solar or wind power. It has a ...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm.
