-----

Sungrow has agreed to supply battery energy storage system (BESS) technology to a large-scale project in Malaysia, one of Southeast Asia's biggest projects of its type.

In line with TNB's vision of developing smart utilities to realise NETR, three CESS pilot projects using lithiumion battery storage technology have been launched.

KUALA LUMPUR (Aug 21): The bidding round for four large-scale, grid-connected battery storage projects in Peninsular Malaysia has attracted ...

KUALA LUMPUR (Aug 21): The bidding round for four large-scale, grid-connected battery storage projects in Peninsular Malaysia has attracted significant interest, with more than 20 industry ...

The first large-scale BESS project is currently being constructed in Sabah, a pivotal development for the country's energy ...

The most recent milestone came in late 2024 when Sarawak Energy commissioned a 60MW/82MWh BESS in Sejingkat, Kuching. This ...

The agreement, focusing on Phase 2 of EVE Energy's manufacturing facility development, promises to revolutionise Malaysia's energy storage capabilities while creating ...

China's Largest Semi-Solid-State Energy Storage Project Connected to the Grid. The World Bank will invest in a huge 4GW, 5.12GWh solar-plus-storage complex in Malaysia, ...

The collaboration will focus on the development of utility-scale solar and battery energy storage projects in the Sarawak region. The partners said the MoU provides a ...

The first large-scale BESS project is currently being constructed in Sabah, a pivotal development for the country's energy landscape. This project, developed by MSR ...

The most recent milestone came in late 2024 when Sarawak Energy commissioned a 60MW/82MWh BESS in Sejingkat, Kuching. This project, co-located with a ...

The collaboration will focus on the development of utility-scale solar and battery energy storage projects in the Sarawak region. The ...

Malaysia is rapidly expanding solar and other intermittent renewable generation, creating strong momentum for energy storage. ...

Malaysia is rapidly expanding solar and other intermittent renewable generation, creating strong momentum for energy storage. The country's first four large-scale grid ...

At the heart of this initiative is a massive solar photovoltaic (PV) complex with up to 4 GW of generating capacity, complemented by an impressive 5.12 GWh of battery energy ...

The agreement, focusing on Phase 2 of EVE Energy's manufacturing facility development, promises to revolutionise Malaysia's ...
