How many wind turbines will Marseille Fos produce a year?

The Port of Marseille Fos hopes to have the infrastructure in place by 2028 to ensure the production of 25 wind turbines a year, and 50 floats could be produced annually by combining the capacities of the new facility on the DEOS site with those of Eiffage M&#233;tal.

Are offshore wind turbines a good investment for the future?

Although their initial cost is higher, they produce 60% more electricity, making them a promising investment for the future. On 4 February 2024, the Port of Marseille Fos announced that it was investing EUR550 million to diversify its activities into offshore wind energy in the Fos-sur-Mer industrial port zone.

Is offshore wind energy a viable alternative to fossil fuels?

Offshore wind energy offers a promising alternative to fossil fuels and represents significant potential for economic development. Start-ups, consultancies, manufacturers, and scientists specializing in marine energies are focusing on the sector.
