Developed in collaboration with Zenith Energy and Liontown Resources, this landmark initiative sets a new precedent for integrating renewable energy solutions in the ...

Portable, flexible and cost-effective solar power stations for mine sites. Green, reliable solutions for remote or off-grid locations.

This study aims to develop methods to assess this relationship, to provide results that allow for a holistic understanding of the effects of implementing SBD systems in Australian off-grid mine ...

Improving technology and reduced costs is making it more viable for mining operations to incorporate renewable power generation ...

Improving technology and reduced costs is making it more viable for mining operations to incorporate renewable power generation into their overall energy mix. Off grid, or ...

A groundbreaking 26-megawatt hybrid renewable energy system has begun full operations at a New South Wales mine site, ...

Containerised off-grid power systems designed and built in Australia for farms, mining, remote resorts and communities. Reliable, scalable, pre-wired and factory-tested.

The Australian mining sector is reflecting an industry-wide trend towards more off-grid, renewable energy supply to power operations. What solutions are miners opting for, and ...

As Australia works towards achieving its net-zero goals by 2050, this project serves as a benchmark for

integrating renewables into traditionally hard-to-decarbonize ...

A groundbreaking 26-megawatt hybrid renewable energy system has begun full operations at a New South Wales mine site, marking the first time an off-grid solar and battery ...

The system is expected to provide up to 40% of the mine site's total power supply but includes a "hydrocarbons-off" functionality that will ...

The Australian mining sector is reflecting an industry-wide trend towards more off-grid, renewable energy supply to power ...

Outside of the mining sector, the government has been actively pursuing the adoption of microgrids through funding initiatives to provide a more reliable energy supply for Australia's ...

The system is expected to provide up to 40% of the mine site's total power supply but includes a "hydrocarbons-off" functionality that will enable the mine to be run solely on ...

As Australia works towards achieving its net-zero goals by 2050, this project serves as a benchmark for integrating renewables into ...
