Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

How will a battery storage project benefit Ottawa?

The battery storage project alongside the six solar projects Council supported earlier this fall will reduce the city's reliance on expensive gas-fired electricity during peak demand and strengthen Ottawa's ability to meet its climate and energy commitments.

Is Ottawa looking at regulatory changes around battery energy storage facilities?

Ottawa is looking at regulatory changes around these types of facilities. (Ross D. Franklin/The Associated Press) UPDATED: City councillors unanimously approved the new rules for battery energy storage facilities at their meeting on Feb. 12, 2025.

Will Ottawa City Council approve Marchurst battery storage zoning?

"Ottawa City Council's approval of the Marchurst battery storage zoning is a strong and welcome step in our local energy-transition journey, but it is only one step.

Professor Schell was interviewed by Stu Mills of CBC Ottawa to explain the need for battery energy storage systems in the Ontario power grid, and particularly in Ottawa.

The project can store 250 MW of electricity, making it the largest battery energy storage system proposed in the Ottawa area so far. A 250 MW battery can supply enough ...

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System

("BESS") is the fastest emerging technology in North America and is planned ...

Workers check battery storage pods at a lithium-ion battery storage energy facility in Arizona last year. Ottawa is looking at regulatory changes around these types of facilities.

More than 60 speakers lined up Thursday to speak to the City of Ottawa's Agricultural and Rural Affairs Committee over a proposal to ...

Ottawa city council overturned a unanimous rejection of a municipal support resolution (MSR) for a controversial battery energy storage system (BESS) in the South March area.

Professor Schell was interviewed by Stu Mills of CBC Ottawa to explain the need for battery energy storage systems in the Ontario ...

BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, ...

More than 60 speakers lined up Thursday to speak to the City of Ottawa's Agricultural and Rural Affairs Committee over a proposal to build a vast electrical storage ...

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging ...

BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high ...

We're carefully adding new technologies to improve how we manage the grid, creating one that's smarter and more capable of seamlessly integrating distributed energy ...

Changes have been made to the city's Official Plan and zoning bylaws to create a building for storing electricity in off-peak hours from the grid.

BESS are an emerging battery technology that can help make the electricity system more reliable by drawing and storing energy from the grid during off-peak hours, when ...

Changes have been made to the city's Official Plan and zoning bylaws to create a building for storing electricity in off-peak hours ...

Workers check battery storage pods at a lithium-ion battery storage ...
