Do I need a permit for a commercial energy storage system?

Commercial energy storage systems must be designed by an Electrical Engineer. If a photovoltaic system is also part of the installation, please refer to the City of Covina - Residential Submittal" checklist. Solar PV systems will be on a separate SPV permit. *NOTE: that LA County Fire review and approval is required prior to permit issuance.

Is energy storage safe in California?

Installing energy storage in California is a common practice, and safety is a top priority. The CPUC offers links to the most relevant best practices and standards for ensuring safe installation of energy storage on this page.

Do I need planning clearance for a commercial energy storage system?

Planning clearance is required prior to submission to Building Application for permit. Commercial energy storage systems must be designed by an Electrical Engineer. If a photovoltaic system is also part of the installation, please refer to the City of Covina - Residential Submittal" checklist.

What is a battery room energy storage system?

Battery rooms Energy Storage Systems. An automatic smoke detection system or radiant-energy detection system shall be installed in rooms, walk-in units and areas containing energy storage systems as required in CBC and CFC Section 1206. Location and layout diagram of the room or area in which the ESS is to be installed.

Best practices can make installation of energy storage safe. The CPUC offers links to the most relevant best practices and standards from a wide range of sources on this page.
