-----  
How do charging stations work in Antwerp?

Charging stations in Antwerp are operated by different providers. It is also possible to access a charging station using a charging card from a different provider, but you always pay the rate applied by the provider of the charging station in question. What are the rates? Each provider applies its own rate.

How will the port of Antwerp Bruges hub support the transition to electric transport?

The hub at Port of Antwerp Bruges is the starting point for one of the first corridors connecting Antwerp with Stockholm. "We are confident that that this development will not only support the transition to electric freight transport but also reinforce Europe's leadership in sustainable mobility solutions", Anja van Niersen, concluded.

What is the power rating of the Antwerp battery project?

The Antwerp battery project has a power rating of 25 MW and capacity of 75 MWh. The installation will be operational by the end of 2024. The project uses 40 Intensium Max High Energy lithium-ion containers supplied by Saft. TotalEnergies has a portfolio of 450,000 BtC and 100,000 BtB electricity sites in Belgium.
