Members of the project cluster are from Southern European islands where ideal summer conditions make solar cooling a reliable option for sustainable air conditioning.

Solar air conditioning, or "solar-powered air conditioning", refers to any air conditioning (cooling) system that uses solar power. This can be done through passive solar design, solar thermal ...

Various European research and demonstration activities have advanced the field of solar energy for air conditioning of buildings. The project intends to review the state-of-the ...

The potential energy savings and limitations of solar thermal air conditioning in comparison to conventional technologies are illustrated and discussed.

The market potential for solar cooling with small-scale capacity is very large, so that different companies are developing solar cooling kits for the product business.

Solar PV driven air-conditioning is beginning to emerge through the small size segment (split air-conditioners) in Asia. However, if such a system allows PV generated electricity to be ...

This paper describes the main results of the EU project SACE (Solar Air Conditioning in Europe), aimed to assess the state-of-the-art, future ...

In a coastal house on one of the North Aegean islands, two hybrid solar air conditioners (DC inverter units with direct PV input) were installed in 2025.

This paper describes the main results of the EU project SACE (Solar Air Conditioning in Europe), aimed to

Solar air conditioning on a southern European island

assess the state-of-the-art, future needs and overall prospects of solar cooling in ...

OverviewHistoryPhotovoltaic (PV) solar coolingGeothermal coolingSolar open-loop air conditioning using desiccantsPassive solar coolingSolar closed-loop absorption coolingSolar cooling systems utilizing concentrating collectors Solar air conditioning, or "solar-powered air conditioning", refers to any air conditioning (cooling) system that uses solar power. This can be done through passive solar design, solar thermal energy conversion, and photovoltaic conversion (sunlight to electricity). The U.S. Energy Independence and Security Act of 2007 created 2008 through 2012 funding for a new solar air conditioning research and development p...

The market potential for solar cooling with small-scale capacity is very large, so that different companies are developing solar cooling kits ...
