-----

A completely integrated solution: the container, which includes metering and monitoring components as well as communications infrastructure. The single source solution ensures ...

While maximizing power transfer remains a top priority, utility grid stability is now widely acknowledged to benefit from several auxiliary services that grid-connected PV inverters may ...

A shipping container solar system is a modular, portable power station built inside a standard steel container. A Higher Wire system includes solar panels, a lithium iron phosphate ...

Solar micro inverter system with grid-connected units featuring high-performance MCU, MOSFETs, drivers.

Large-scale, grid-connected or standalone systems for high-demand applications. Ideal for utility-grade resilience hubs and remote ...

20 foot standard container delivery, easy to transport A complete solution, from inverter to main step-up transformer When the container is lifted to the foundation, only LV and MV cables ...

Large-scale, grid-connected or standalone systems for high-demand applications. Ideal for utility-grade resilience hubs and remote communities. Supports microgrid portfolios with multiple ...

The integrated containerized photovoltaic inverter station centralizes the key equipment required for grid-connected solar power systems -- including AC/DC distribution, inverters, monitoring, ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.
