When operational in Q4 2026, the facility will store enough compressed air to power 400,000 homes for 8 hours. At ¥23 billion (\$153 million) construction cost, that's 40% cheaper per kWh ...

Tepco prepares to restart world's biggest nuclear plant, 15 years after Fukushima Tokyo Electric Power Company Holdings' Kashiwazaki-Kariwa nuclear power plant stands ...

Tokyo Century will invest in four wholly-owned extra high-voltage grid-scale battery storage projects totaling 101MW/386.3MWh, the company announced on December 12, 2025. ...

Japan currently has three major pumped hydro projects in various stages of completion, including one serving Tokyo that will have ...

With limited space for solar farms and wind turbines, energy storage systems (ESS) have become the linchpin of Japan's clean energy transition. So what companies are actually making this ...

Japan currently has three major pumped hydro projects in various stages of completion, including one serving Tokyo that will have the world's third-largest pumped ...

This is Tokyo Century's first wholly-owned grid-scale BESS project. Tokyo Century will build a 15.6MW/64.38MWh grid-scale battery storage facility in Nagasaki City, Nagasaki ...

Japanese authorities have approved a decision to restart the world's biggest nuclear power plant, which has sat dormant for more than a decade following the Fukushima ...

It is Japan's first fund exclusively for energy storage that invests in, develop and operate new energy storage plants, including those equipped with renewable energy facilities, ...

Going forward, the plan is to launch the first energy storage station around fiscal 2025, and then proceed with the development and operation of energy storage stations one after another.

Battery storage developer Eku Energy has partnered with utility Tokyo Gas on a grid-scale energy storage project in Japan, with construction expected to start soon.
