Russia has attacked Ukraine's electrical system continuously since the full-scale invasion began. After seizing several of the country's ...

Looking further into the future, NREL and USAID are planning to help Ukraine and its power system operators build a cleaner and more resilient energy system. But this will take ...

In their study, the researchers explain why renewables should take centre stage in the reconstruction of the Ukrainian electricity system. Using detailed maps, they show the ...

Russia has attacked Ukraine's electrical system continuously since the full-scale invasion began. After seizing several of the country's biggest power plants in the initial push, ...

In their study, the researchers explain why renewables should take centre stage in the reconstruction of the Ukrainian electricity system. ...

It finds that a more decentralised system - with growing capacities of rooftop solar, wind, batteries and small modular gas turbines ...

After the initial invasion, Ukraine operated in island mode until they were finally able to synchronize their grid to Europe's. A massive undertaking, islanding then synchronizing a ...

Based on an estimation of the country's wind and solar potential, we argue that these renewables should form the backbone of a future electricity system, as only they meet ...

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self ...

Solar energy has been essential for survival in Ukraine during nearly three years of war since the Russian invasion in 2022. As citizens ...

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

Ukraine is working toward a decentralized and climate-resilient energy system as part of its post-war recovery and long-term climate neutrality goals. This interactive map showcases the land ...

Solar energy has been essential for survival in Ukraine during nearly three years of war since the Russian invasion in 2022. As citizens hope for peace, PV will be instrumental in ...

It finds that a more decentralised system - with growing capacities of rooftop solar, wind, batteries and small modular gas turbines - could mitigate the impacts of the ongoing ...

From the Sun, the center of our solar system, to the planets that orbit it, this Ukrainian lesson will equip you with the Ukrainian vocabulary to understand our immediate cosmic environment.
