Why do Victorians need better mobile coverage and 5G?

Better mobile coverage and 5G is on the way through around 1,200 mobile projects. Victorians depend on good mobile connectivity. It's important for access to healthcare, education and flexible working, and it's critical in emergencies.

How many broadband projects are there in Victoria?

Find out about all Victorian Government mobile, broadband and wi-fi projects for Victoria using the project dashboard. Faster broadband is coming to a place near you through around 150 broadband projects across Victoria. Read about how Connecting Victoria program is fast-tracking connectivity improvements to help communities and businesses thrive.

What is connecting Victoria?

Faster broadband is coming to a place near you through around 150 broadband projects across Victoria. Read about how Connecting Victoria program is fast-tracking connectivity improvements to help communities and businesses thrive. Better mobile coverage and 5G is on the way through around 1,200 mobile projects.

Why is mobile connectivity important in Victoria?

Victorians depend on good mobile connectivity. It's important for access to healthcare, education and flexible working, and it's critical in emergencies. We're working with telecommunications partners to improve mobile services across Victoria, delivering more than 1,200 mobile projects through the Connecting Victoria program.

Find out about all Victorian Government mobile, broadband and wi-fi projects for Victoria using the project dashboard. Faster broadband is coming to a place near you through more than 150 ...

Explore how 5G base stations are built--from site planning and cabinet installation to power systems and cooling solutions. Learn the ...

Abstract: With the maturity and large-scale deployment of 5G technology, the proportion of energy consumption of base stations in the smart grid is increasing, and there is an urgent need to ...

The MBSP is delivering improved coverage outcomes and benefits to the Australian community with over 1,188 base stations activated as at 31 November 2025. Base stations funded under ...

The recently completed TPG mobile tower in Kilsyth is providing more than 8 km² of improved 4G and 5G coverage to over 4,350 households, and marks the halfway point for the ...

Proper scheduling of surplus capacity from gNBs and BESSs in different areas can provide sustainable frequency support for the power system without compromising the ...

Explore how 5G base stations are built--from site planning and cabinet installation to power systems and cooling solutions. Learn the essential components, technologies, and ...

This paper discusses the site optimization technology of mobile communication network, especially in the aspects of enhancing coverage and optimizing base station layout.

The procurement, testing and deployment of base station antennas - a critical component in the delivery of mobile communications ...

The proposed capacity model and control methods are evaluated using a case study of a two-machine test system with 10,000 real 5G base stations, demonstrating the ...

Find out about all Victorian Government mobile, broadband and wi-fi projects for Victoria using the project dashboard. Faster broadband is coming to a ...

In this study, we developed a stochastic model to analyse the information and communication interaction between a base station and a set of subscribers in a 5G cluster with ...

The procurement, testing and deployment of base station antennas - a critical component in the delivery of mobile communications - will be simpler for operators and ...
