-----  
What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects--all while reducing carbon footprint and cutting energy costs.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

Are Victorians buying bigger solar systems?

If the line is rising in the bottom graph, it tends to indicate Victorians are buying increasingly bigger systems--use the dropdown menu towards the top of the page to zero in on specific system size price trends. To see detailed installation figures for any town or suburb in Victoria, check out our solar in your location tool.

Why did Victorian solar prices drop in 2019?

The averages are generated from pricing reported by Victorian reviewers on SolarQuotes and are based on system purchase date. Note that the significant price drop in 2019 was due to the Victorian solar rebate coming into play, which reduced system installation costs considerably.
