A Windhoek manufacturing plant cut energy costs by 40% after installing a 150 kWh BESS paired with solar panels. The system paid for itself in 3.2 years, proving ROI in Namibia's sunny climate.

The 107.67 kWp grid-tied solar photovoltaic (PV) system, which was unveiled this week, is expected to generate more than 200,000 kWh of electricity annually.

Leading insurer, Momentum Metropolitan Namibia, has unveiled a rooftop solar power facility at its head office in Windhoek, marking a significant step towards renewable ...

"The sun on our national flag is more than a symbol - it is a reminder of the hope, warmth and promise that binds us as Namibians drawing energy from that very source, we are not only ...

The 1.6MW rooftop solar plant at Maerua Mall generates clean energy to power retail and operational activities, reducing electricity costs and the mall's carbon footprint.

The 107.67 kWp grid-tied solar photovoltaic (PV) system, which was unveiled this week, is expected to generate more than 200,000 kWh of electricity ...

Emcon Consulting Engineers is a Namibian consultancy firm operational in the building services, energy, sustainability, civil engineering, and project management sectors, with its head office ...

We have a proven track record - we are the leading solar power company in the sunbelt countries where climate conditions are extreme. If ground mounted or installed on ...

SolarCity's mission is to empower communities, businesses, and individuals with reliable, affordable, and eco-friendly solar energy solutions. We tailor rooftop solar systems to meet the ...

Last month alone, the city approved 47 new solar installations - enough to power 160 households through load-shedding blackouts. Local installers report three main drivers behind the solar ...

This study presents the outcome of a utility-run rooftop photovoltaic (PV) power plant with battery energy storage systems (BESS) as a viable solution for enhanced energy ...
